Applicants elect with traverse to prosecute claims 1-13 and 41-42 of Group I drawn to compounds of formula I and compositions comprising the same.

The election is made with traverse for the following reasons. The compound claims of the Examiner's proposal, and compositions comprising the same from the claims of Groups I-III, claims 1-42, are closely related subject matter. In particular groups I and III are remarkably related structures. Applicants therefore maintain that the restriction requirement for these groups is inappropriate. Searches conducted for the compounds will also provide results regarding their use, accordingly claims to groups I-XI should be examined together.

Applicants maintain that the process claims (groups XII-IVX) directed to preparing the compounds of groups I-III should also not be subject to restriction.

For the reasons above, it is respectfully asserted that this restriction requirement is improper, and withdrawal is respectfully requested.

Applicants reserve all rights to file divisional and/or continuation patent applications in non-elected claims.
